

# R 336

## Your RoRo Tractor for Seaports and Industries

The R 336 is the advanced model of the original R 332. This unit features a more powerful engine and a stronger rear axle, paired with the right tires to handle your transport tasks with ease.

With a 5<sup>th</sup>-wheel lifting capacity of 36 tons, it supports higher system loads. This makes the R 336 the ideal tractor for RoRo operations with heavier loads or for demanding transport requirements in steel mills.

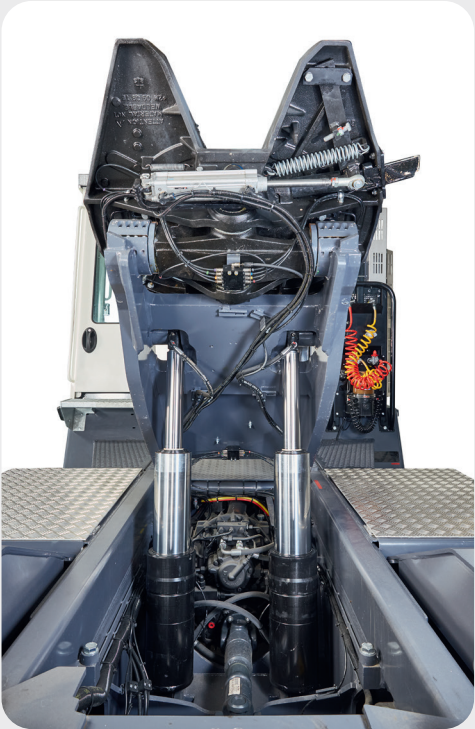

Vehicle type

R 336

Operating areas	Seaports, Industries and Steel Mills
System load	up to 388,014 lbs (176 ton) (GCW)
Engine	Diesel engine
Tractor weight	approx. 22,050 lbs (10,000 kg)
