

R 332 Z

MAFI R 332 Z

Tractor With Ballast Weight

The R 332 Z tractor is equipped with a ballast weight in order to pull drawbar trailers. The tractor comes with a base plate of approx. 2 tons. In order to ensure a proper traction, this ballast weight can be increased according to the expected payload of the drawbar trailer.

Different types of ballast weights are available. You can choose from either fixed ballast weights or detachable ones with a parking stand. Brake and electric connections for the trailer are mounted next to the trailer hitch at the rear.
